

Product Case Study

Case Study: Grilla Shutter & Steel doors at Wellbar Central, Newcastle-Upon-Tyne

Client: Tolent
Architects: Lister Associates
Main Contractor: Tolent

Project details: Wellbar Central is a landmark development that provides 120,000 sq.ft of cutting edge office accommodation over nine floors. The stunning design will enrich the whole area and set new standards for development following on from the high quality finishes, specification and design incorporated within Time Central.

Client requirements: Large security shutter with specific ventilation, entry and safety requirements along with steel doors for fire exits and plant rooms. A high quality of workmanship was required in order to maintain the buildings high quality finishes.

Door Solutions: Armourpost supplied and installed a bespoke 8m x 7m Grilla shutter for the car park entrance ensuring an optimal mix of ventilation and security was obtained. This also included swipe card access, safety beams and a safety edge.
In addition a number of steel fire doors and security doors were also supplied for the perimeter of the building.
